- Social Research positions have been converted to career banded classifications. Social Research positions are now managed under career banding policies and guidelines. Implementation Complete.

#### Suspension of Career Banding

Senate Bill 1741 Page 123 states that all State agencies must suspend implementation of career banding for classifications which have not already been approved by the State Personnel Commission. Completion of approved classification implementation must be completed no later than February 1, 2007. As such, at the current time no other classifications other than those listed above have been approved for implementation.

The following classifications: Institutional Services, Operations & Trades, and Administrative Support, completed the process of competency development; however, it was determined by the CCPS Career Banding Steering Committee that CCPS would suspend final implementation of these groups pending further action by the legislature.

Information is current as of February 6, 2007. All information is subject to change.
